Chemical Free SKINCARE Non-Toxic

Ever notice all of the choices in the Pharmacy, Health & Beauty Aid departments begging to be tried and applied.

Something that has become increasingly important to our whole family is what we put on our skin and the “fuel” we put into our bodies.

Skin plays a key role in our well being because it serves as a protective barrier and can absorb up to 80% of what we put on it. Therefore, you want to make it priority to select **All Natural, Non-Toxic, and Botanical Based** whenever possible.

Chemicals, artificial colors, and fillers in skin care products and make up can cause chemical burns & a variety of skin irritations. Many people are even allergic to chemicals commonly found in conventionally produced products. I, Kathie, have used many of the finer products on the market but the results have all been the same; chemical burns that take 2 weeks to heal; at the very least, I am left with dry patches on my face. I have not experienced any such problems with my girls' skin care products due to the obvious... No Chemicals. *Bless the Lord!*

Natural Skin Care Products work with your skin instead of against it. What a blessing to have both a daughter, **Bethany Joy**, of **“Bee Joyful”** and daughter-in-law/love, **Joy**, of **“Indescribablejoy”** making and creating ALL NATURAL, CHEMICAL FREE Skin Care for all ages.

Great for Gift Giving!! Look no further. 😊

Check out their list of products **Front & Center of the homepage.**

Just click the link> **‘HONEY, BEESWAX CANDLES, SKINCARE & more...’**

You are invited and always welcome to come shop & browse our display rooms and boutique at the Main Farm @ 3415 East Cohoctah Road, Linden

BEEKEEPING 101

WINTER WORKSHOPS

@ the Main Farm

January-April every year

Interested in having someone help you put some of your *puzzle pieces* together so you know what you can expect if/when you start keeping bees?

Wondering... What equipment/tools you really need to keep bees? **When & how** do you order bees? You need only attend one workshop.

There is **no cost** to these **2 hour workshops** and absolutely worth carving out your time for this event.

Step #1> Go to our website calendar for the dates and details at the end of each month; Wednesday (6-8pm), Thursday (6-8pm) & Friday, (10am-12pm)

Step #2> Contact us with the date that works best for you.

Step #3> Get your bees on order ASAP if you plan on keeping bees this spring.

Step #4> Go to our website calendar JUN/AUG classes/field trips on our website Calendar to Register.

NEW BEES

There are many **“up & coming beekeepers”** catching the bug to keep bees; much more ready to try something new or think a bit more outside “the box”. We take great pleasure in helping people become successful; sometimes this means helping them learn from their mistakes. One saying that comes to mind is, **“If at first you don’t succeed, try, try again.”**

The better part of the learning has to do with accepting the nature of the honey bee as it always has been, then conforming to her. Beekeeping is fascinating and if you like to learn or **enjoy a good game of strategy, beekeeping will very likely captivate you!**

Please register for our winter/spring workshops JAN-APR and/or classes in JUN/AUG. These are extremely helpful if you like learn.

INTERESTED IN FIELD TRIPS??

(5-Star we are told)

We have these available as well. Time & cost customized per interest level & schedule.

Email us: info@turtlebeefarms.com

We take great pleasure when those who have come to us with possible fear & trepidation from the bees and then leave with a **“smile on their face and a bounce in their step,”** armed with knowledge and empowered for having conquered their fear of honey bees.

We can help! (810) 266-4880 ☺

.... Give us a call, text, or email.

Please keep checking back, there’s more to come...
